```java
class Student {

    private int rollNum;

    private String studName;

    private int mark1;

    private int mark2;

    private int mark3;

    private int totalMarks;

    public void setStudentDetails(int rollNum, String studName, int mark1, int mark2, int mark3) {

        this.rollNum = rollNum;

        this.studName = studName;

        this.mark1 = mark1;

        this.mark2 = mark2;

        this.mark3 = mark3;

    }

    public void calculateTotal() {

        totalMarks = mark1 + mark2 + mark3;

    }

    public void displayStudDetails() {
```

```java
        System.out.println("Roll Number: " + rollNum);

        System.out.println("Student Name: " + studName);

        System.out.println("Total Marks: " + totalMarks);

    }

}

class student1 {

    public static void main(String[] args) {

        Student student = new Student();

        student.setStudentDetails(101, "rahul", 85, 90, 95);

        student.calculateTotal();

        student.displayStudDetails();

    }

}
```
